

Training in Regulatory Affairs for Pharma and Medtech

SFL and its highly experienced Regulatory Affairs team offer different types of trainings where participants can learn both the basics as well as the latest developments in Regulatory Affairs.

Whether you are new to the field or come from a start-up and want to develop a medicinal product, medical device, IVD or combination product, you need to understand the risks and opportunities of the applicable regulatory framework. If you are already an experienced Regulatory Affairs professional, you may want to deepen your knowledge on a specific topic through a specific training customized for you and your organization.

Our team of experts at SFL offers three different types of workshops in Regulatory Affairs: **Introduction to Regulatory Affairs**, **Advanced Regulatory Affairs** and **Customized Regulatory Affairs Training**.

| Training Types | INTRODUCTION TO REGULATORY AFFAIRS | ADVANCED REGULATORY AFFAIRS | CUSTOMIZED REGULATORY AFFAIRS TRAINING |
|-----------------|--|--|---|
| Content | General overview of the legislative framework and regulatory procedures for drugs, devices, IVDs and combination products in the EU and Switzerland. | Extended in-depth overview of the regulatory procedures for the development, registration and lifecycle management of drugs, devices, IVDs and combination products. | This training will be customized according to your needs, either as a course on a specific topic or as an extended Q&A on questions that you can submit in advance. |
| Audience | Intended for those who are new to Regulatory Affairs or want to get a general overview on Regulatory Affairs. | Intended for those who want to acquire a strong foundation, or for professionals wishing to broaden or update their knowledge in Regulatory Affairs. | Ideal for those with specific questions on the development of their products or a request for more insights on selected topics in Regulatory Affairs. |
| Duration | 1/2 day | 1 day | Customized |

We look forward to discussing your company's needs and to providing training courses tailored to your products and strategic objectives.
